

MICHAEL
LANGLEY
ARCHITECTURE

Wootton Road

Our clients came to us with a brief to completely transform a tired 1950's bungalow in rural Kempston, Bedfordshire. The works included a complete reconfiguration of the internal layout, large two-storey rear extension, porch extension and a raised ridge height to provide 1st-floor accommodation.

Careful consideration was taken during technical design as the clients intend to build the project in a phased manner. Phase 1 including undertaking the extension's and internal alterations at ground floor level and Phase 2 focusing on developing the first-floor accommodation and first-floor rear extension. Our clients have opted to undertake the project as a self-build and MLA are continuing to offer support and technical advice throughout the build.

We are hoping to see the 1st phase of the project completed in late 2020. Follow our Instagram to keep updated on our live projects
